PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 7 years of experience building and scaling web applications across Java/Spring Boot backends and React/Next.js frontends. Led multi-application migration from Java Struts to Spring Boot, implemented CI/CD automation, and independently shipped production-grade side projects. Strong in microservices architecture, REST API design, and AI-assisted development workflows.

EXPERIENCE

ACCENTURE | Senior Software Engineer (Senior Analyst)
February 2024 – Present | Bangalore, IN

- Led migration of **3 Java Struts applications** to **Java 17 + Spring Boot**, reducing average response time by 40% and eliminating critical security vulnerabilities.
- Implemented **OAuth2 and JWT-based authentication** across all migrated services, achieving compliance with enterprise security standards.
- Built and maintained a comprehensive **JUnit test suite** with 85%+ code coverage, reducing production defects by 30%.
- Automated CI/CD pipelines using **Jenkins**, cutting deployment time from 2 hours to 15 minutes and enabling daily releases.
- Integrated **Swagger/OpenAPI** documentation for 20+ endpoints, streamlining onboarding for cross-team developers.
- Leveraged **GitHub Copilot and Copilot CLI** to accelerate development velocity, reducing boilerplate coding time and improving code review turnaround across the team.
- Mentored a team of 4 junior developers in Spring Boot best practices, test-driven development, and DevOps workflows.

INFOSYS LIMITED | Technology Analyst
May 2022 – January 2024 | Bangalore, IN

- Developed high-throughput **Spring Boot microservices** for a voice analytics platform processing 5,000+ requests/minute, improving speech recognition accuracy by 15%.
- Designed and deployed services on **PCF Cloud**, reducing deployment cycles by 20% and streamlining CI/CD pipelines.
- Implemented centralized logging with **Datadog** and real-time monitoring via **Kibana**, reducing system downtime by 25%.
- Achieved 99.8% test pass rate through load testing with **JMeter** and performance profiling with **Dynatrace**.

COLAN INFOTECH | Software Engineer
October 2021 – April 2022 | Chennai, IN

- Built a full-stack event management platform using **Flutter + Java**, serving 500+ concurrent users with real-time WebSocket notifications.
- Designed role-based access control with JWT authentication, enabling customized event workflows for organizers, vendors, and attendees.

DIVERGENT DEVELOPMENT LABS | Software Engineer
August 2019 – October 2021 | Madurai, IN

- Developed **Vidyaan**, a Learning Management + ERP system using Java, Kotlin, and Android SDK, growing active user engagement by 95%.
- Implemented GitHub Actions CI/CD pipeline, improving deployment frequency by 50% and system uptime by 30%.
